

# MAG LAYERS

*cutting-edge magnetics*

To all Mag Layers' Customers, Partners, and Friends,  
A message from Vice-President Steve Tennessen.

Our thoughts are with all those who have been impacted by the COVID-19 coronavirus outbreak, especially those whose loved ones are fighting the illness...

Right now, we are experiencing the biggest challenges our industry will likely face in our lifetime. Mag Layers USA is doing all we can to help our customers keep moving forward.

- **We have capacity to support global needs.** We want everyone to maintain productivity during this difficult time, please let us know what we can do to help with your production. We want to help with shortages or crosses if you have a supply chain impacted by COVID-19 restrictions.
- **Our global factories are fully operational.** We are building our products in our factories and sending out orders from our locations in Asia and the USA.
- **Safety is everyone's business.** To make sure our employees and customers stay safe, we have restricted site entry and support all domestic and international travel bans to help prevent the spread of the coronavirus.
- **Communication is a top priority.** We have systems in place to ensure continued operations and support our customers through email, telephone, and web conferencing.

We will move forward per the guidelines set by local and federal governments. Our management team is monitoring and involved in daily operations. We'll continue to share updates as the situation unfolds. We look forward to returning to in-person and face to face meetings when this terrible illness is eradicated.

If you have questions contact our sales team, or call us at **1 (714) 898-8377**.

Sincerely,

**Steve Tennessen**
